Re: Witwatersrand Consolidated Gold Resources Limited
Rule 12g3-2(b) File No. 82-34986

SUPPL

Dear Sirs:

The enclosed interim report and supplemental information is being furnished to the Securities and Exchange Commission (the "SEC") on behalf of Witwatersrand Consolidated Gold Resources Limited (the "Company") pursuant to the exemption from the Securities Exchange Act of 1934 (the "Act") afforded by Rule 12g3-2(b) thereunder.

This information is being furnished under paragraph (1) of Rule 12g3-2(b) under the Act with the understanding that such information and documents will not be deemed to be "filed" with the SEC or otherwise subject to the liabilities of Section 18 of the Act and that neither this letter nor the furnishing of such information and documents shall constitute an admission for any purpose that the Company is subject to the Act.

Very truly yours,

PROCESSED

Overview

During the six month period under review, Wits Gold has raised additional capital by means of a private placement of 879 928 shares with North American, European and South African investors. These shares were issued at R95, a discount of 4,6% to the ruling price on 27 June 2007. The net proceeds of R81,4 million will be used to fund the Company's principal exploration projects in the Southern Free State, Potchefstroom and Klerksdorp Goldfields over the next 18 months. The main focus remains the De Bron-Bloemhoek area where a fourth borehole is currently in progress since in-fill drilling was commenced during August 2006. Recent drilling results have been encouraging and a revised resource estimate for this area is likely to become available during the fourth quarter of 2007.

Events subsequent to the review period

The Wits Gold Annual General Meeting was held at the JSE Limited (JSE) in Johannesburg on 12 October 2007. Two non-executive directors, Prof Taole Mokoena and Dr Humphrey Mathe, were re-appointed by the shareholders, following their retirement by rotation. In addition, shareholders were requested to approve the implementation of a share scheme designed to attract, incentivise and retain Company personnel. This scheme was subsequently approved and will be applied to all directors, officers and staff.

Future exploration

Wits Gold has identified five key exploration projects on the basis of their potential to contain Witwatersrand reefs with elevated gold grades at less than 2 500 metres below surface. The selection of these priority targets was based on a review of the Company's geological database that now consists of 207 boreholes with almost 3 000 reef intersections. Particular attention will be focused on the three projects in the Southern Free State Goldfield, where the Beatrix, Kalkoenkrans and Leader Reefs are all preserved at depths of the order of 500-2 000 metres below surface and contain gold grades comparable to those being exploited by the surrounding mines. In the Potchefstroom Goldfield, drilling will soon commence in the Kleintontein area, where six discrete reef units are being tested in the area immediately west of the Blyvooruitzicht Mine. In the Klerksdorp region, an assessment of the available geological and seismic information is being undertaken in order to select an appropriate drill site. It is anticipated that in this area, the Vaal Reef is likely to be situated at depths of the order of 3 500 metres below surface.

The Company is involved in the mineral exploration industry and does not generate any operating income. Mineral exploration is highly speculative due to a number of significant risks, including the possible failure to discover mineral deposits that are sufficient in quantity and quality to justify the completion of pre-feasibility or feasibility studies. Despite historical exploration work on the Company's prospecting rights, no known bodies of commercial ore or economic deposits have been established. Substantial additional work will be required in order to determine if any economic deposits occur on the Company's properties.

The Company has previously been able to raise sufficient capital from its shareholders to fund its operating and exploration requirements. If the Company's current exploration programmes are successful, additional financing will be required to complete pre-feasibility and feasibility studies as well as developing any mineral properties identified in order to bring them into commercial production. The exploration of the Company's prospecting rights is dependent upon the Company's ability to obtain additional financing through the joint venturing of projects, debt financing, equity financing or other means. In future, such sources of financing may not be available on acceptable terms, if at all.

Basis of preparation

The interim condensed financial statements for the six months ended 31 August 2007 were prepared in accordance with IAS 34 – Interim Financial Reporting and in compliance with The Listing Requirements of the JSE.

The financial information has been prepared on the basis of the recognition and measurement requirements of International Financial Reporting Standards (IFRS).

The accounting policies of the Company have been prepared in accordance with those previously reported in the 2007 annual financial statements.

Independent review

The Company's auditors, KPMG Inc., have reviewed the interim condensed financial statements for the six months ended 31 August 2007. Their unqualified report is available for inspection at the registered office of the Company.

In preparation for a proposed secondary listing of the Company's shares on an international stock exchange, the Company requested KPMG Inc. to review these interim condensed financial statements.

Dividend

No dividend has been declared for the period under review (31 August 2006 – Nil).

Interim operations

The operating loss for the six months under review increased by R0,8 million when compared to the first six months of the prior year. The increase in operating loss results mainly from the fact that most categories of expenditure had increased due to an increase in the level of activities.

The loss before and after taxation reduced by R4,4 million due to an increase in interest received (R1,7 million) and the revaluation of a financial asset by R3,5 million.

The Company spent R7,9 million (2006: R1,2 million) on intangible exploration assets and R0,8 million (2006: R0,8 million) on property, plant and equipment due to increased exploration activity. The non-current assets have also increased by an amount of R3,5 million (2006: Nil) as a result of the initial recognition of a financial asset.

Commitments

The Company's commitments amount to R42,8 million, of which R42,7 million is in respect of exploration activities.

Prospects

The Company's main focus for the near term future will be on the drilling programmes in the Southern Free State and Potchefstroom Goldfields. The objective in the Southern Free State will be to build on the current 3,8 Moz of indicated gold resources whilst in the Potchefstroom area exploration will initially concentrate on multi reef targets to the immediate west of Carletonville Goldfield.

Independent Review Reveals A Substantial Increase In The Indicated Gold Resource
To Almost 20Moz.

Wits Gold (JSE: WGR; ADR: WIWTY.PK) wishes to announce the results of an
independent review of the Company's gold and uranium resources by Snowden Mining
Industry Consultants. These revised estimates are compliant with the Canadian
National Instrument 43-101.

In summary, the Snowden review reveals the following estimates:

- Total indicated gold resource of 19.4Moz (compared to 3.9Moz in a previous
Snowden estimate)
- In addition, an inferred gold resource of 130.4Moz (compared to 155.8Moz in
a previous Snowden estimate)
- Total inferred uranium resource of 54.3Mlbs (compared to 136.3Mlbs in a
previous Snowden estimate)

"This resource update is the most significant development for the Company since
its floatation on the JSE in April 2006" commented CEO, Dr Marc Watchorn. "The
fivefold increase in our indicated gold resource confirms that the Company has
the capability to build a serious mining operation in the southern Free State.
Specifically, the Bloemhoek-De Bron project has the potential to develop into a
world class ore body, ranking by size in the top ten of the world's undeveloped
gold projects. The total gold resource is slightly down, but still leaves Wits
Gold with the sixth largest gold resource in the world. Despite the fall in the
inferred uranium resource estimate, we would remind investors that this figure
is likely to remain fluid due to the substantial prospecting rights in the Free
State, Potchefstroom and Klerksdorp areas that are currently under application
with the Department of Minerals & Energy."

The new resource estimate follows the completion of five additional diamond
drillholes in the southern Free State that support the establishment of an
improved geological model. Consequently, it is now apparent that the main target
of gold mineralisation in this area is a laterally continuous zone of
conglomerates represented by a composite of the Beatrix and Kalkoenkrans Reefs.
Similar geological conditions have been identified on the adjoining Beatrix and
Joel Gold Mines where these reefs have been mined extensively. Supplementary
mineralisation is also hosted by the regionally recognised Leader and B Reefs as
well as a number of other reefs that have been exploited elsewhere in the Free
State Goldfield. Revised resource estimates for the Hakkies, Bloemhoek, De Bron
and Robijn Projects in the southern Free State are as follows:

Hakkies Project	Mt	Au(g/t)	U3O8(kg/t)*
Indicated Resources			
Beatrix	8.8	4.8	0.108
Leader	9.9	4.8	0.179
Inferred Resources			
Beatrix	2.0	4.8	0.108
Kalkoenkrans	0.1	3.0	0.046
B Reef	10.5	5.3	0.075
Upper Leader	15.7	3.9	0.142
Leader	10.7	4.8	0.178
Intermediate	9.7	7.5	0.095
Bloemhoek Project	Mt	Au(g/t)	U3O8(kg/t)*
Indicated Resources			
Beatrix	27.0	5.7	0.125
Kalkoenkrans	18.7	8.9	0.139
Leader	6.7	4.7	0.176
Inferred Resources			
Beatrix	6.8	5.1	0.114
Kalkoenkrans	4.0	10.3	0.160
B Reef	0.5	6.4	0.082
Upper Leader	0.8	4.5	0.167
Leader	3.9	4.9	0.181
De Bron Project	Mt	Au(g/t)	U3O8(kg/t)*
Indicated Resources			
Beatrix	10.8	5.3	0.118
Kalkoenkrans	1.5	7.1	0.110
Leader	3.8	4.5	0.171
Inferred Resources			
Beatrix	5.7	5.4	0.121
Kalkoenkrans	0.7	7.1	0.111
B Reef	3.3	6.5	0.083
Upper Leader	0.1	3.6	0.140

Leader	2.2	4.4	0.168		
Robijn Project	Mt	Au(g/t)	U3O8(kg/t)*		
Indicated Resources					
Beatrix	13.6	5.8	0.129		
Inferred Resources					
Beatrix	9.0	5.7	0.127		
SOPS Total	Mt	Au (g/t)	Moz (Au)	U3O8 (kg/t)*	U3O8 (Mlbs)
Indicated Resources	100.7	6.0	19.4	0.136	30.2
Inferred Resources	85.8	5.5	15.1	0.127	24.1

* Note: The U3O8 resource estimates in the southern Free State are classified as inferred only due to the estimation method applied. As uranium is considered a secondary product, uranium was only reported from blocks where the gold accumulation exceeded the reporting cut-off of 300cm.g/t Au.

In the Potchefstroom and Klerksdorp Goldfields the resource estimates are unchanged relative to those contained in the Wits Gold prospectus issued in April 2006. It should be noted that variation applications to include uranium in Company's prospecting rights in the Potchefstroom and Klerksdorp Goldfields are currently under consideration by the Department of Minerals & Energy. Estimated resources in these areas are as follows:

Potchefstroom Goldfield

Kleinfontein Project	Mt	Au(g/t)	U3O8(kg/t)
----------------------	----	---------	------------

Inferred Resources

Vaal	0.04	2.1	-
Cobble	0.3	4.3	-
Middelvlei	23.2	5.2	-
Carbon Leader	19.6	7.3	-
North Leader	4.1	5.2	-

Kleinfontein Deeps	Mt	Au(g/t)	U3O8(kg/t)
--------------------	----	---------	------------

Inferred Resources

Vaal	0.2	2.4	-
Cobble	8.9	4.5	-
Middelvlei	5.8	4.7	-
Carbon Leader	9.4	6.0	-
North Leader	16.8	4.7	-

Potch Deeps Project	Mt	Au(g/t)	U3O8(kg/t)
---------------------	----	---------	------------

Inferred Resources

Vaal	18.9	9.8	-
Cobble	142.5	4.7	-
Middelvlei	3.9	5.5	-
Carbon Leader	16.8	16.2	-
North Leader	12.1	9.4	-

Deelkraal Project	Mt	Au(g/t)	U3O8(kg/t)
-------------------	----	---------	------------

Inferred Resources

VCR	20.5	14.6	-
-----	------	------	---

Boskop Project	Mt	Au(g/t)	U3O8(kg/t)
----------------	----	---------	------------

Inferred Resources

Middelvlei	6.7	5.2	-
Carbon Leader	13.3	15.8	-
North Leader	10.8	5.8	-

Potchefstroom Total	Mt	Au(g/t)	Moz (Au)	U3O8 (kg/t)	U3O8 (Mlbs)
---------------------	----	---------	----------	-------------	-------------

Inferred Resources	333.6	7.1	75.8	-	-
--------------------	-------	-----	------	---	---

Klerksdorp Goldfield

Kromdraai Project	Mt	Au(g/t)	U3O8(kg/t)
-------------------	----	---------	------------

Inferred Resources

Vaal	57.5	16.2	-
------	------	------	---

Cyfervlei Project	Mt	Au(g/t)	U3O8(kg/t)
-------------------	----	---------	------------

Inferred Resources

Vaal	19.2	10.3	-
------	------	------	---

Groenfontein Project	Mt	Au(g/t)	U3O8(kg/t)
----------------------	----	---------	------------

Inferred Resources

Vaal	8.2	11.9	-
------	-----	------	---

Klerksdorp Total	Mt	Au(g/t)	Moz (Au)	U3O8 (kg/t)	U3O8 (Mlbs)
------------------	----	---------	----------	-------------	-------------

Inferred Resources	85.1	14.5	39.5	-	-
--------------------	------	------	------	---	---
